METERING ASSET DEVICE MANAGEMENT SOFTWARE

WATT-Net Plus[™]

WATT-Net Plus™ is the most comprehensive asset management and integrated meter testing software solution in today's market.

- Features full lifecycle management of all metering assets and seamless integration of all meter testing data.
- ▶ Leverages all the power of RADIAN or WECO NIST traceable hardware.

Solutions for everyday meter shop challenges may be further customized with WATT-Net Plus ™ maximizing productivity:

- First Article Testing
- Sample/Periodic Testing
- Site Management
- RMA Tracking
- Function Testing Automation
- Advanced Custom Configuration

Field and Shop Management: Asset and device managemen is seamless with real-time field test equipment sync capabilities, online connectivity, and platform integration.

Complete Integration: The WATT-Net Plus[™] system of record easily accommodates utility requirements for full integration with numerous platforms.

WECQ 4330X Advanted Nation First Burd Advanted Nation Fir

WATT-NET PLUS INTEGRATION

DEPLOYMENT METHODS:

- WATT-Net Plus System of Record
- WATT-Net Plus Bridge
 - Listener/API

HEAD END SYSTEM ADAPTERS:

- Command Center

MANUFACTURER ONLINE PORTAL

SUPPORTED PLATFORMS:

- SAP®
- Maximo®
- MDM/ODM
- CC&B
- NISC
- CIS

WATT-Net Software Features

WECO Software Solutions serves every utility of every size!

	WATT-Net Basic	WATT-Net Express	WATT-Net Limited	WATT-Net Plus
Manual Export of Test Data		•		•
Powerful Custom Reports				
Dynamic Sequencing		•		•
Barcode Scanning and Printing				
New Meter Support				
CTs, PTs, Transducers, and Standards		•		•
Manual Site Administration		•		•
Shop Administration		•		
Field Data Upload		•		
Harmonics Testing		•		
Advanced Query Save and Recall				
RM17 Test Result Import				
Two-way Field and Shop Synchronization				
Power Quality Capture		•		•
Site Wiring/Multiplier Verification		•		•
Configurable Manufacturer File Import		•		•
Energy Reading Sets with Validation		•		•
WECO Legacy Data Conversion		<u> </u>	<u> </u>	<u> </u>
AMI Device Installation History		•	•	•
Manual Test Entry		•	•	•
Management Dashboard		•		
Obsolete Device Tracking		•		•
Security Roles and Access Control				
Photo/Document Store and Recall				
Firmware and Program ID Version Tracking				
Unlimited Equipment Sync				
Centralized Database				
Proxy Sync (Inter-node Sync)		•		•
Dataview Configuration Editors				
Reference Standard Calibration Test Scheduling		•		
Popup Comments				
NISC Integration				
Workstation Alerts				
Enterprise Integration				
Advanced Reporting Filters				
Shop Transformer Testboard Interfaces				•
Purged Device Archive				
Automated Site Administration			•	•

WATT-Net Plus Features:

- Advanced AMI Management, Testing, and Configuration Functionality
- Meter Shop Customizable Management Capabilities
- Roles-based Administration provides control and Security
- Reporting (Listing, Counts, Statistics)
- New Device and Sample Management
- Sample/Periodic Test Management, Testing & Reports
- **Device Configuration Management**
- Site Management
- **Equipment Editors**
- **Equipment and Device State Tracking**
- Audit and Certification Traceability
- **Business Rules Engine**

Device Support: Electric revenue meters, reference standards, current transformers, potential transformers, and testboards are currently supported.

Please contact your sales representative for additional information on WATT-Net Plus and other RADIAN or WECO software products and services.
