

# WECO 9050

## Warm-Up Board

### Overview

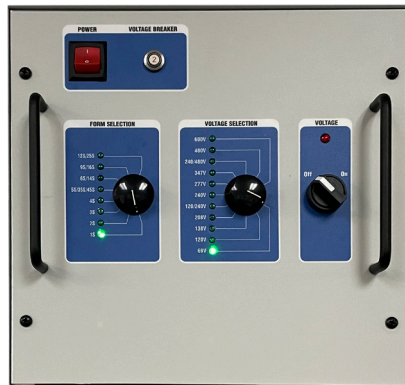

The WECO 9050 Warm-Up Board from Radian Research provides a safe, easy-to-use solution to your AMI meter functional testing needs.

Avoid tying up your accuracy Test Boards with basic meter failures. Validate the following quickly and easily with the WECO 9050:

- Meter Power-up
- Meter Displays
- AMI Communications
- Firmware Version
- Disconnect Switch Operation
- Clear Error Status

Each vertical bank of four sockets is isolated, using a power switch and circuit breaker protection.

The WECO 9050 uses the highest quality meter socket design that you've come to expect from the leader in metering solutions. Safety is of paramount importance, with each socket isolated with a safety interlock mechanism. The addition of a plexiglass socket shield helps guide meter blades into the zero insertion force jaws. Furthermore, the socket shield helps minimize inadvertently dropping meter seals on socket conductors.

### Key Features

- Zero Insertion Force meter sockets
- All aluminum frame construction
- Dead front safety interlocks and socket shield
- Does not require socket bypass adapters
- Single or double sided, up to 56 meter capacity
- Selectable ANSI meter form switch: 1S, 2S, 3S, 4S, 5S/35S/45S, 6S/14S, 9S/16S, 12S/25S
- Selectable Voltage switch: 69V, 120V, 138V, 208V, 120/240V, 240V, 277V, 347V, 240/480V, 480V, 600V
- Service 120V/15A
- Separate resettable safety breakers for each column
- Roll around locking wheels for mobility
- Manual lever jaw release
- 2 year warranty

**There is no Energy Reference Standard or current source in this solution.**
